Join our list of satisfied customers - try us today!

With your help we made a very good decision. I'm very happy with the New Handpieces I got from you! Thanks Again for your patience.

Dr. Gurmukh Singh Sahi | Calgary, AB

I have my electrics in and going this week. They are incredible, it is like trading in a Corolla for a Ferrari. Won't be needing air turbines any longer!

Dr. R Gardiner Squamish, BC

THE BEST PRICE & ADVICE

Serving BC and Canada-wide since 1998!

HAPPY CUSTOMERS :-)

We strive to offer our customers the best service & repair!

Absolutely the best! It's just like you're right here in Calgary. Speedy great service and excellent prices on the new NSK Handpieces.

Barb, Dr. Peter C. Chan Calgary, AB

Thanks again for your prompt service Rob...always a pleasure doing business with you!

Cheryl Christmas Fall River, NS

HIGHSPEED REPAIRS

TURBINE PROBLEMS?

- Low Torque • Bur Chatter • Seized • Bur Slipping
- High Pitch • Stuck/Broken Bur • Vibration

OTHER PROBLEMS?

- Water/Chip Air Spray • Coupler Leaking
- No Light • Flickering/Dull LED

WE OFFER:

- Factory OEM Turbines • Euro Aftermarket Turbines
- Turbine Rebuilds

ELECTRICS & ATTACHMENTS

We only replace the necessary parts but you're guaranteed optimum performance. Replacement of bearings, rotors, o-rings, seals, gears, springs, cartridge replacement and rebuilds are just some of the things we offer. All services include adjustment, clean, lube and test.

IMPORTANT: If not properly maintained, Electric handpieces can cause burns. So it's important to check the handpiece for normal operation before each procedure (see below).

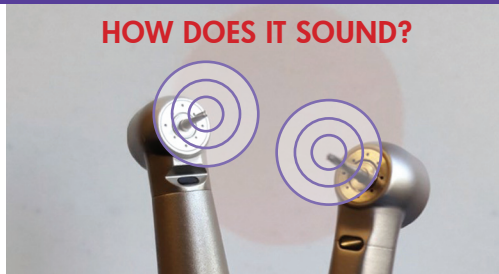

SAFETY CHECK FOR YOUR ELECTRIC HANDPIECE

DOES IT TURN SMOOTHLY?

With handpiece **NOT** attached to motor, insert and manually rotate bur between fingers. Bur should rotate smoothly without a gravelly feel—there should be **NO** turning restriction or wobble!

HOW DOES IT SOUND?

With handpiece attached to motor, run handpiece at a variety of speeds, and stop and start a couple times—there should be **NO** grinding, rattling or clicking noises!

IS THERE EXCESSIVE HEAT?

With handpiece attached to motor, run handpiece for approximately 20 seconds at maximum speed. Immediately stop running and **with caution** touch head and neck to check for anything abnormal—there should be **NO** heat felt or hot smell!

HASSLE FREE—NO OBLIGATION ESTIMATES WITH QUICK TURNAROUND—CALL US TODAY!

WE SPECIALIZE IN ALL HANDPIECE REPAIR + SMALL EQUIPMENT

Precision Dental is my go to for fast quality handpiece repairs. I am very satisfied with their level of service and professionalism.

Dr. David Calgary, AB

Just wanted to say a huge "Thank You" for being good to your word. Appreciate you getting our surgical handpiece back to us so promptly.

Elaine, Dr. T. Greene Delta, BC

I've been a Precision customer for many years and they have what it takes to keep my office running smoothly. I appreciate that I can get an honest, friendly and professional experience each time.

Dr. Peter Walford Hornby Island, BC
